

Fundy Grinding: 2 shops & 3 services

Fundy Grinding has been in business for more than 30 years. The Truro-based company has grown and provides services locally and also across Canada and the world. The business has two shops and three divisions: Machinery Tool Sales, Machine Shop and Millwright Services.

Machine Tool Sales Division

Fundy Grinding and Machining Sales Division includes both woodworking and metalworking equipment. Our Sales Division is the largest stocking supplier of metal and woodworking equipment and tooling in the Atlantic Provinces.

At Fundy Grinding and Machining, we believe one of the most important aspects of customer service, is our staff. All of our staff are highly skilled and knowledgeable about all of our products. Our staff includes five full time salesmen and three service technicians. All of our team members strive to ensure that each of our customers' needs are met.

We supply parts manuals and parts for a wide variety of machinery; for new as well as older makes and models. Our extensive lines and inventory of machine tools, woodworking tools and accessories are sure to satisfy all the needs of everyone from the hobbyist to the largest and most modern of production shops.

Machine Shop & Millwright Services

The Machine Shop offers a full range of services, including Manufacturing, Repair, Welding and Design. Equipment ranges from conventional machinery to CNC machinery.

Onsite millwright and machining services range from boring a small hole in a boom truck to working with a company's maintenance team to schedule and control a planned shutdown in major industrial plants. Onsite equipment is maintained and inspected and can be modified to fit most customer needs. "We can bring our shop to yours," say company officials.
