

Residential

One-stop construction

Global Construction (Maritimes) takes care of all aspects of construction – from the foundation to the roof and everything in between.

“We take it from start to finish,” says Rudi Loeffler, co-owner with his wife, Gudi. The company handles residential and commercial construction, new homes and renovations.

The Debert-based firm employs licensed carpenters, plumbers, electricians; owns excavators, 45’ man-lift, and all general equipment to complete the job. They are fully insured, certified, and are in good standing with WCB. A financial piece of mind for the customer.

“Everything we do is to make it easier for the customer; it’s like one-stop shopping.”

“We are very diversified,” says Rudi. We do excavation, install ICF foundations, septic system, and install solar, heat pumps, stonework for landscaping and much more.

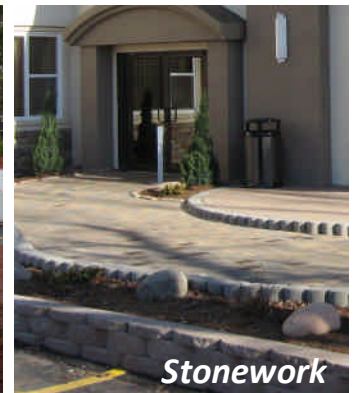

Uniting the different aspects of the business is quality workmanship and service, attention to detail and ongoing customer communication.
